

DIN-Power E048FP-11,5C1-2

Image is for illustration purposes only. Please refer to product description.

| | |
|--------------------|---|
| Part number | 09 05 248 6851 |
| Specification | DIN-Power E048FP-11,5C1-2 |
| HARTING eCatalogue | https://b2b.harting.com/09052486851 |

Identification

| | |
|----------------------------|------------------|
| Category | Connectors |
| Series | DIN 41612 |
| Identification | Type E |
| Element | Female connector |
| Description of the contact | Straight |
| Features | lead-free |

Version

| | |
|-----------------------|---|
| Termination method | Press-in termination Wrap termination |
| Connection type | Motherboard to daughtercard Mezzanine |
| Number of contacts | 48 |
| Contact configuration | Rows a, c and e, positions 2, 4, ... , 30, 32 |
| Termination length | 11.5 mm |
| Coding | Hole coding Coding with loss of contacts |
| PCB fixing | With fixing flange |

Technical characteristics

| | |
|------------------------------------|--------------------|
| Contact rows | 3 |
| Contact spacing (termination side) | 5.08 mm 5.08 mm |
| Contact spacing (mating side) | 5.08 mm 5.08 mm |

Pushing Performance
 Since 1945

Technical characteristics

| | |
|----------------------------------|---|
| Rated current | 6 A |
| Rated current | Rated current measured at 20 °C, see derating curve for details |
| Clearance distance | ≥3 mm |
| Creepage distance | ≥3 mm |
| Insulation resistance | >10 ¹² Ω |
| Contact resistance | ≤15 mΩ |
| Limiting temperature | -40 ... +105 °C upper limiting temperature limited by the pcb |
| Insertion and withdrawal force | ≤75 N |
| Performance level | 2 acc. to IEC 60603-2 |
| Mating cycles | ≥400 |
| Test voltage U _{r,m.s.} | 1.55 kV |
| Isolation group | IIIa (175 ≤ CTI < 400) |
| PCB thickness | ≥1.6 mm |
| Hot plugging | No |

Material properties

| | |
|---|--|
| Material (insert) | Thermoplastic resin, glass-fibre filled |
| Colour (insert) | RAL 7032 (pebble grey) |
| Material (contacts) | Copper alloy |
| Surface (contacts) | Noble metal over Ni Mating side Ni Termination side |
| Material flammability class acc. to UL 94 | V-0 |
| RoHS | compliant |
| ELV status | compliant |
| China RoHS | e |
| REACH Annex XVII substances | Not contained |
| REACH ANNEX XIV substances | Not contained |
| REACH SVHC substances | Not contained |
| California Proposition 65 substances | Yes |
| California Proposition 65 substances | Antimony trioxide Nickel |
| Requirement set with Hazard Levels | R26 |

Pushing Performance
Since 1945

Specifications and approvals

| | |
|------------------------|--|
| Specifications | IEC 60603-2 |
| UL / CSA | UL 1977 ECBT2.E102079 CSA-C22.2 No. 182.3 ECBT8.E102079 |
| Railway classification | F4/I3 acc. to NFF 16-101/102 |

Commercial data

| | |
|--------------------------------|--|
| Packaging size | 20 |
| Net weight | 22.53 g |
| Country of origin | Romania |
| European customs tariff number | 85366990 |
| GTIN | 5713140009196 |
| eCl@ss | 27460201 PCB connector (board connector) |

Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (non-intermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques acc. to IEC 60512-5-2

Hole coding (without loss of contact)

To avoid cross-plugging of adjacent connectors a coding system is required.
Drill out the male connector at pre-centered point according to the sketch. Use the setting tool 09 99 000 0103 to insert the coding pin 09 06 000 9950 into the existing hole in the female connector.

Coding with loss of contacts

To avoid cross-plugging of adjacent connectors a coding system is required.

The coding is achieved by means of a code pin which is inserted into the selected chamber of the female connector (the contact cavity must be filled with a female contact!).

The opposite male contact must be removed with the help of the specially designed tool. It's recommended to use at least 3 pins.

Coding pin 09 04 000 9908

Removal tool for male contacts 09 99 000 0038

Recommended configuration of plated through holes

| | | |
|--|----------------------------|---------------------------|
| Tin plated PCB (HAL) acc. to EN 60352-5 | Drilled hole \varnothing | 1,15±0,025 mm |
| | Sn | max. 15 μm |
| | plated hole \varnothing | 0,94 - 1,09 mm |
| Chemical tin plated PCB | Drilled hole \varnothing | 1,15±0,025 mm |
| | Sn | min. 0,8 μm |
| Gold /Nickel plated PCB | Drilled hole \varnothing | 1,15±0,025 mm |
| | Ni | 3 - 7 μm |
| | Au | 0,05 - 0,12 μm |
| Silver plated PCB | Drilled hole \varnothing | 1,15±0,025 mm |
| | Ag | 0,1 - 0,3 μm |
| Copper plated PCB (OSP) | Drilled hole \varnothing | 1,15±0,025 mm |
| | plated hole \varnothing | 1,00 - 1,10 mm |

In addition to the hot-air-level (HAL) other pcb surfaces are getting more important. Due to their different properties, such as mechanical strength and coefficient of friction we recommend the above mentioned configuration of pcb through holes.

Assembly instructions

It is highly recommended to use HARTING press-in tools to ensure a reliable press-in process. Please refer to the catalogue for tools, machines and further information for the press-in process.

Mating conditions

To ensure reliable connections and prevent unnecessary damage, please refer to the application data diagrams. These recommendations are set out in IEC 60603-2. The connectors should not be coupled and decoupled under electrical load.
