Identification

| Category | Connectors |
|----------------------------|-----------------|
| Series | SEK Low-profile |
| Element | Male connector |
| Description of the contact | Straight |

Version

| Termination method | Press-in termination |
|--------------------|----------------------------|
| Connection type | PCB to cable PCB to PCB |
| Number of contacts | 50 |
| Termination length | 5.5 mm |

Technical characteristics

| Contact rows | 2 |
|------------------------------------|--------------------|
| Contact spacing (termination side) | 2.54 mm |
| Rated current | 1 A |
| Insulation resistance | >10 ⁹ Ω |
| Contact resistance | ≤20 mΩ |
| Limiting temperature | -55 +105 °C |
| Insertion and withdrawal force | ≤100 N |
| Performance level | NM 30 (S4) |
| Mating cycles | ≥250 |
| Test voltage U _{r.m.s.} | 1 kV |

27460201 PCB connector (board connector)

Current carrying capacity

The current carrying capacity of the connectors is limited by the thermal load capability of the contact element material including the connections and the insulating parts. The derating curve is therefore valid for currents which flow constantly (nonintermittent) through each contact element of the connector evenly, without exceeding the allowed maximum temperature.

Measuring and testing techniques acc. to IEC 60512-5-2

① Temperature raise

② Derating curve

③ Derating curve 80%

Recommended configuration of plated through holes

In addition to the hot-air-level (HAL) other pcb surfaces are getting more important. Due to their different properties, such as mechanical strength and coefficient of friction we recommend the above mentioned configuration of pcb through holes.
